Curriculum Vitae Summary

Name: Assistant Professor Dr. Ghassan Jasim Hadi
Position: Academic and Researcher, Department of Optics Technologies, College of Health and Medical Technologies / Al-Dour.
Specialization: Chemical Engineering.

Professional Summary

An academic and researcher with extensive experience in higher education, scientific research, academic administration, quality assurance, and curriculum development. His research focuses on chemical engineering, advanced materials, catalysis, and water treatment.

Academic Qualifications

Ph.D. in Chemical Engineering (2007); M.Sc. in Chemical Engineering (2000); B.Sc. in Chemical Engineering (1996).

Leadership and Administrative Positions

Currently serves as Head of the Quality Assurance Division. Previously held the positions of Assistant Dean for Scientific Affairs and Head of several academic departments.

Academic Experience

Teaching specialized courses, supervising postgraduate students, participating in scientific and academic committees, and contributing to curriculum development and academic quality assurance.

Research Activities

Published numerous scientific papers in internationally recognized journals indexed in Scopus and Clarivate. Research interests include catalysis, nanomaterials, water treatment, and chemical reaction engineering.

Conferences and Academic Activities

Actively participated in national and international scientific conferences and contributed to various academic and research activities.

Professional Skills

Academic Quality Assurance, Scientific Research, Statistical Data Analysis, AutoCAD, Civil 3D, and Microsoft Office.

Awards and Recognition

Recipient of numerous letters of appreciation and recognition for outstanding academic, administrative, and research contributions.
